

# Content Outline

Interaction Foundations Spring 2024

Max Douglass

## Project Title: Dune(novel) website

I'd like to build a site that gives people a good idea of the content/themes and styles of the novel Dune. I think having separate pages and lots of visuals is the best way to organize this content. There are a lot of visuals that could be used from the recent movies, along with art that people have done for the books.

### Pages:

- Homepage/Introduction
- Origins/Author
- Plot
- Characters
- Themes
- Franchise Overview (Sequels, Adaptations)
- Possible additional features?:
  - o Gallery
  - o Timeline
